

**T.JAUERNIG ELECTRONICS DESIGNED
THE Gristle KING – REV3**

Thank you for purchasing the GRISTLE KING.

Like the Rev 1 and 2, Rev 3 of the Gristle King continues to bring righteous tone for days. This time around, some small tweaks have been made to the overdrive (Gristle) side of the pedal. There is now more available gain on tap, the tone control works over a broader range, the bass boost switch boosts just a little bit more, and humbucking pickups now sound just as good as single coils. Enjoy, and go forth and deliver the rock to the people!

CONTROLS EXPLAINED

GRISTLE - Use this control to set the amount of gain desired

TONE - Sets the tone of the overdrive

GRAVY – Sets the output level of the overdrive

MORE – Sets the boost level

PRE/POST – This feature places the boost either before, or after your overdrive. Use the PRE setting to give you an additional boost in the level of gain. Use the POST setting to boost the volume of the signal, such as a lead boost.

FLAVOR – Selects between a throaty open type of overdrive (left), or a more compressed type of overdrive sound (right)

PHAT- with this switch toggled to the left, there is an increase in the low end of the overdrive effect.

The **GRISTLE**, and **MORE** footswitches turn on the respective effects. Each effect can be used separately or in combination.

NOTE: A “pop” may be heard for the first few minutes of use when turning the effects on and off. This is normal, and goes away in a few minutes.

BATTERY REPLACEMENT: To replace the battery in your Gristle King, remove the bottom cover plate of the pedal. The pedal can also be powered by a 9-volt DC power supply. Note: Use only a DC supply of correct voltage and polarity. **NOTE:** Plugging into the input jack of the pedal turns on power to the unit. To preserve battery life, always unplug the cord from the input when not in use. The external DC power jack disconnects the battery when a power supply is plugged into it to preserve battery life.

WARRANTY: The Gristle King is warranted against failure from normal use for one year from the original date of purchase. All shipping and customs charges shall be the responsibility of the purchaser. Should a replacement or repair be needed, contact:
